I really like Remya ma'am teaching method. I didn't have to study much while preparing for my exams, I just had to go through it once because my concepts were clear in class itself.

All the teachers are really good..each of them have a different quality which is the reason I like them too..but i would like to say something about Ms. Remya M. Gopal.. because of her ability to explain and connect each topic with some relatable examples,, situations etc...her knowledge base is excellent, teaching skills are also superb and she always provide useful feedbacks to all of us .. during her regular class and also in mentoring sessions.

Average teaching skills

Felt as if namrata mam must have skimmed the surface of the subject and taught just the important stuff without explaining why it's important and the most basics of basic things were left out of explanation and did not realise that till the question bank came, cause it was my first time seeing and learning C language besides that her explanations were satisfactory.

Good behaviour of all teachers

Teachers should be aware that they do not treat students as if they are commanding a herd of sheep or make personal comments in haste. Elegant nature of teachers and respectful treatment towards students contributes to a positive personality of students in long term. Students look up to their teachers as GURU.
