

Best Practice 1

Title: Positive Psychology

Objectives:

- To create awareness about enhancing the Emotional Quotient (EQ) of both students and faculty members.
- To offer a starting point for self-inquiry and self-efficacy.
- To help students understand the relevance of positive thinking in their life through a series of modules and activities.
- To motivate the students to pursue personal meaning and fulfillment in their lives.

Context :

Students, today, are overwhelmed with stress and anxiety due to academic, peer and various pressures experienced in day-to-day life. Panic attacks, anger management issues, suicides, various addictions are on the rise. In such a scenario, a gentle yet firm intervention by the educational institution, the student is part of, becomes necessary. Our institution introduced Positive Psychology Sessions in the academic year 2018-19 when Mental Health Awareness in educational institutions was yet gaining ground in India.

The Positive Psychology sessions in our institution began with the motive of helping students to develop the Emotional Quotient (EQ) by cultivating positive thought patterns, gaining confidence, building resilience, improving one's behaviour, developing communication skills and an optimistic approach toward life.

Practice:

Content for the modules are carefully compiled and created by a specific team within the Internal Quality Assurance Cell (IQAC) which facilitates activity-based learning. The programme is conducted for all the undergraduate students at the institution. The objectives of the programme are achieved through lectures, class discussions, mini projects and indoor activities. Post session assignments such as reading, review, quizzes are incorporated in the curriculum.

Positive Psychology has successfully evolved as one of the most popular certificate programmes offered by the institution. Another vital evidence for the success of the Positive Psychology course and its institutionalization is the positive feedback from students.

Evidence of Success

After introducing Positive Psychology sessions, both students and faculty members felt a significant increase in energy, boost in morale and enhancement in performance. Since the pedagogy was majorly activity oriented in the second phase of Positive Psychology, it encouraged maximum student participation as they felt highly involved in the entire process.

PRINCIPAL
Mahatma Education Society's
Pillai HOC College of
Arts, Science & Commerce
Pillai HOC Educational Campus
Rasayani, Tehuka Khalapur
Dist. Raigad, Pin- 410 207

Problems Encountered:

Initially, many students seemed sceptical about the need for Positive Psychology sessions. An introductory session was planned to create awareness regarding the importance and benefits of the sessions. While delivering the modules in the classrooms, the faculty members found it challenging and sometimes difficult to generate interest among the students. To overcome this obstacle, the content development team added many activities relevant to the corresponding topics in the modules.

Resources Required: Teaching materials, Trained and qualified faculty, Infrastructure

Best Practice 2

Title: Trivariate Mentoring

To ensure holistic development of every student in our campus, we initiated Trivariate Mentoring programme that captures the true essence of our devotion toward the development of every student's intellectual capability and emotional intelligence. The programme is executed in three different phases: Mentor-Mentee Mode (MMM), Mentoring through Peer Groups (MPG) and Vertical Mentoring (VM).

Objectives:

- To help the students identify career paths and support their personal growth.
- To provide students with an opportunity to learn and practice professional networking skills.
- To inculcate a vision in students which will help them to identify and pursue opportunities for employment related to their academic qualifications and competencies.

Context:

The Trivariate Mentoring Programme helps the students to develop and improve their reasoning and communication skills, self-motivation, self-discipline, leadership skills, organizational, self-management skills and goal-setting. The programme also helps students to learn various skills through their teachers, classmates and senior students. Our structure of mentoring is beneficial to both the mentors and the mentees.

Practice :**1. Mentor Mentee Mode(MMM)**

In Mentor Mentee Mode, every student/mentee is assigned a mentor who meets with them in person once in a month, starting from their first year. In this interaction, mentors try to analyze the progress of their students/mentees and keep track of the mentee's academic records, attendance and behavioural aspects.

The mentor encourages the personal and academic development of the mentee through imparting knowledge and sharing experiences and expertise. This session is recorded by the mentor in order to assess the progress of mentees.

2. Vertical Mentoring (VM)

Vertical Mentoring enables senior students to engage with junior students through lectures on diverse topics. This helps both senior and junior students to learn from each other. Advanced learners from the senior batches are identified by the faculty members as mentors for this programme and then they are motivated to engage their juniors in an informative and interactive session. In this process, the senior students improve their presentation and communication skills while the juniors get a chance to learn and interact with the senior students.

3. Mentoring through Peer Groups (MPG)

In MPG the mentor and mentees are students from the same class. This gives an opportunity to advanced learners to improve their skills and share their knowledge with their peers. This also encourages average students to work hard and improve their performance. The students may take turns as 'mentor' and 'mentee', but overall, peer mentoring is about creating a formal support system.

The Programme Coordinators divide the class into batches and select a student mentor from each batch. Respective subject teachers and class coordinators supervise and keep track of these sessions. This develops an environment of co-learning.

Evidence of Success

Faculty advisors identified students with capabilities and willingness to take up mentorship and assign them topics to be conducted. Faculty members made sure that the students were encouraged to fight their fears and take up the role of being a mentor to juniors. Junior students and student mentors were encouraged to employ presentation slides and audio-visual aids to make every session engaging and interactive.

Problems Encountered and Resources Required

Active participation of each student is required for a satisfactory completion of the session. Some students show some indifference to participate in the mentoring sessions since it is not part of the curriculum. Mentoring Booklet, trained and qualified faculty members ensure the effectiveness of the practice.
