

PHCASC Research and Innovation Lab

The Research and Innovation Lab of Pillai HOC College of Arts, Science, and Commerce serves as a dynamic platform designed to nurture creativity, critical thinking, and problem-solving skills among students and faculty members. It aims to create an ecosystem where ideas can be explored, tested, and developed into impactful solutions that contribute to scientific progress, industry needs, and societal development. The R&I team encourages students and faculty to engage in original research across a wide range of domains. Provides mentorship, resources, and infrastructure to support innovative ideas from inception to execution. Fosters interdisciplinary collaborations, linking theoretical knowledge with practical applications and promotes publication of research papers, participation in conferences, and filing of patents. The activities under the R&I lab include workshops, seminars, project development, innovation challenges & hackathons, as well as research paper writing & publication guidance.
